

to some real ballots & he can detect if they are fake by looking for creases & printing items using his scanner technology. Trump has all the statistical data being analyzed, the videos, emails, phone calls, bank transfer statements showing the coordination of the coup. We know Zuckerberg funded and manned it. Soros funded it. He has the Racketeering Influenced and Corrupt Organization (RICO) law passed in 1970. President Trump has crimes against humanity videos, which Wikileaks just released massive videos. Julian Assange is about to be pardoned, so he can talk about Seth Rich. Now that the governors and secretary of states certified the illegal ballots and Biden has accepted them, they knowingly committed treason! Criminals are desperate and stupid! We just raided the solar company and Dominion is closing up the shop. Many media company CEOs are gone. The same goes for many politicians. President Trump has the CIA servers from Germany used to change Dominion machines and he will soon have access to the state's machines too. He baited them to staying in DC so they could be inaugurated...arrested! Biden has not accepted any transition money nor has Kamala given up her seat. The military has infiltrated Antifa & BLM and President Trump has the financial tracings. He knows exactly which politicians took Chinese and Soros money. He put in Miller & Watnick. He also just reduced more regulations and wrote an Executive Order in the military line of succession. He is defunding the CIA. He just replaced Kissinger & Albright on the National Security Advisory Board with his loyalists. The military has been flying more planes over America and to Guantanamo for the first time in years. The DNC wanted to close Gitmo, but President Trump said no way and said softly under his breath, "I want to use it for her", meaning crooked Hillary. The navy just parked huge naval fleets on both coasts. The 82nd airborne is preparing for an operation (same group of Flynn & Donoghue). Things are falling into place. He has it all. He is just laying out the case and building the narrative. He knows he won and they cheated. He gave them the chance to fix things. They chose not to. Do not feel sorry for them. They did this to themselves. Share share share, copy and paste if u have to get this  truth of facts out there y'all. God be with us all God be with president Trump and his administration and legal team. God be with our country and the true American people God bless all. Hold the line my friends.
